ProNote1

The Multi-Currency Banknote Value Counter

The ProNote is a **banknote counter** successfully tested by the European Central Bank and other national banks. It's able to check and count mixed banknotes. It is a compact and secure system with a maximum speed of up to 1.500 notes per minute.

Equipped with a colored TFT-Touchscreen and an easy menu navigation, this banknote counter meets all customer requirements in an easy to use, compact and secure system. Thanks to the latest technology, updates on new banknotes of almost any currency are very simple and can be applied in a very short time.

Mixed value counting mode *

validation and value counting of mixed banknotes (Please ask for availability of your local currency.)

Currency check mode

validation, piece counting and checking of pre-sorted banknotes

Piece counting mode

pure piece counting without validation of security features

Validation of several security features *

UV	validation of UV security features
IR	infrared sensor
MG	validation of magnetic security features
ST	security thread detection
3D	detection of length, width and thickness
EuroMag®	magnetic thread code reading
Image Recognition	(*double) CIS technology
